About ASG

A division of
HESCO

Strong internal &
external principals

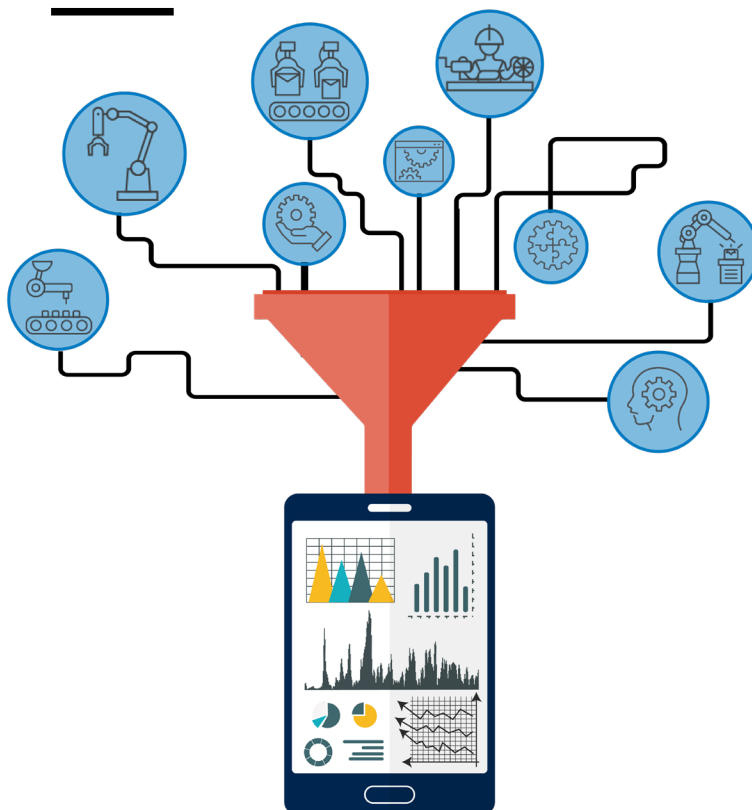

Applied Services Group (ASG) is a leading provider of high technology control and cabling solutions to industrial markets across the USA. As a certified UL 508A facility and having been awarded United Technologies Corporation Supplier Gold status, our customers can be assured of receiving the highest levels of quality and service.

Our modern 35,000+ square foot building located in the Inwood Rd Industrial Park in Rocky Hill, CT includes distribution, warehousing and manufacturing.

As part of the HESCO organization, ASG offers solutions in superior manufacturing, assembly and test capabilities and is highly experienced in control systems, panel layout, design and assembly.

Whether the requirement is for simple assembly and testing of a control panel using customer supplied components or a complete design, sourcing, assembly and testing of a system including controllers, HMIs, drives, motors, sensors, power and communication devices; ASG is ready and qualified to perform to any requirement.

Smart Manufacturing & Industry 4.0

With ASG, our customers can always stay ahead of modernization for their company. We provide a wide range of knowledge and product for in-plant modernization which can boost a company's productivity and efficiency.

Solutions range from data collection devices at existing machines pushing information up to the cloud, to new automation work cells using motion control and robotics. All involving the latest technology and safety components from proven suppliers.

ASG can assist your company to navigate Industry 4.0 by co-developing custom solutions that best fit your future manufacturing strategy. Team up with us today as your manufacturing partner.

Solutions

Quick-Turn Customized Products & Solutions

Custom Control Assemblies

- Build to print or require design clean up
- R&D prototype to full production with FAT process
- One-off systems to mass production
- Quick-turn project capabilities
- AutoCAD or Photo-documentation of assemblies
- On-site labor / installation

Cable Assemblies

- ATEX and IECEx Certified for explosive environments
- Military specification cables
- HIPOT testing to 5K volts
- Potted cabling capabilities
- Testing up to 200 conductors
- Certified to IPC-A-620 standards

Enclosure Modifications

- Certified Hoffman Modification Center
- Modify stock enclosures from AutoCAD file
- All size cutouts, materials including stainless steel
- Quick turn-around, less than 1-week
- Clean cuts; professional look
- ASG can create your design files if required

Professional Service

ASG brings experience and knowledge to our customers in the following process and discrete markets, water & wastewater, power & energy, oil & gas, packaging, aerospace & defense, food & beverage, chemical and transportation.

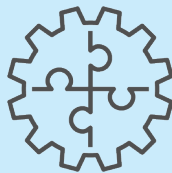

**MODIFIED ELECTRICAL
ENCLOSURES**
